RESEARCH INTERESTS	• Astrominformatics: machine learning methods, AI, cross-discipline science • Data intensive astronomy: exploration of optimal analysis methods/algorithms/approaches. • Astrostatistics, Bayesian statistics, development of novel statistical analysis frameworks. • Simulation-based inference, and cosmological analyses beyond 2-point. • Astronomical survey science: enhancing robust reduction of survey data; enabling science. • Developing novel algorithms for robust statistical inference of large datasets. • Observational Cosmology with late-time probes: cosmic shear, galaxy clustering. • Weak lensing tomography: exploration and mitigation of systematic effects. • Weak lensing magnification: exploring dust transport and feedback processes in galaxies. • Galaxy clustering: development of novel algorithms for mitigation of spurious clustering. • Galaxy-galaxy lensing: enhancing methods for robust measurement at low separations. • Pipelines: Optimising cosmological parameter estimation frameworks and infrastructure. • Photo-z estimation: developing novel methods for improved line-of-sight localisation. • $N(z)$ calibration: developing novel methods for unbiased cosmological inference. • Photometric methods and optimisation of imaging analysis in large imaging surveys. • Development/application of novel reduction methods for wide-field imaging surveys. • Development/application of novel algorithms for measurement of multi-band photometry. • Development/application of tools for measurement of galaxy spectral energy distributions. • Studying the build-up of mass (baryonic and dark) in the universe • Studying the evolution of mass functions (stellar, gas, and baryonic) over cosmic timescales. • Investigation of non-photometric methods for estimating stellar population parameters. • Blind HI studies of the local and high redshift universe. • High-resolution quasar spectroscopy; detection of high-z metallicities, isotropic abundances. • Examination of variation in the fine structure constant α via quasar absorption systems.		

EDUCATION **University of Western Australia**, WA, Australia

PhD, **Astrophysics** (Graduated Dec 2017)

- Thesis Title: Using Panchromatic Photometry and HI Surveys to constrain the Galactic Baryonic Mass Function
- Thesis Topic: Deriving an empirical measurement of the galactic baryonic mass function using the unique GAMA dataset, by first optimising photometric estimation, HI flux extraction, and measuring the low-redshift stellar and HI mass functions.
- Supervisors:
Professor Simon P. Driver
Assoc. Prof. Aaron S.G. Robotham
Assoc. Prof. Martin Meyer
- Area of Study: Extra-Galactic Astronomy, Photometric Methods, Astrostatistics

University of New South Wales, NSW, Australia

MPhil, **Astrophysics** (Graduated Mar 2013)

- Thesis Title: Empirical Analysis of Magnesium Isotopic Abundances through Quasar Spectroscopy
- Thesis Topic: Using high-resolution quasar spectroscopy to estimate the impact of detectable Magnesium isotopic abundances on analyses of variation in the fine structure constant α .
- Supervisor: **Professor John Webb**
- Area of Study: Extra-Galactic Astronomy, Quasar Spectroscopy, Cosmology

BSci, **Physics** (Graduated Mar 2011)

- Included award of B.L. Turtle Memorial Prize for Astrophysics (2011)
- Included Senior Thesis project
- Thesis Title: Optimal Quasar Selection for studies of Variation in the Fine Structure Constant α
- Thesis Topic: Identification and selection of optimal quasar candidates for spectroscopic follow-up in studies of variation in the fine structure constant α .
- Supervisor: **Professor John Webb**
- Area of Study: Extra-Galactic Astronomy, Cosmology

EMPLOYMENT **German Centre for Cosmological Lensing**, Ruhr-Universität Bochum, Germany

- Junior Research Group Leader, 4.5 years funding (June 2023 to Dec 2027)
- Junior Research Group Leader & Research Fellow, 2 years (July 2021 to May 2023)
- Research Fellow, 3 years funding (June 2019 to July 2022)

Rheinische Friedrich-Wilhelms-Universität Bonn, Bonn, Germany

- Post-Doctoral Researcher, 3 years funding (Oct 2016 to Oct 2019)

University of Western Australia, Perth, Australia

- APA and UWA funded PhD Student, 4 years funding (Mar 2013 to Sept 2016)
- Lead Residential Advisor, Univeristy College (Mar 2015 to Mar 2016)
- Residential Advisor, Univeristy College (Mar 2014 to Mar 2015)

University of New South Wales, Sydney, Australia

- Lab Demonstrator-in-Charge (Feb 2011 to Dec 2012)
- Lab Demonstrator (Feb 2010 to Feb 2011)

ACADEMIC **Grants** **2013 to Present**

- EXPERIENCE
- DLR PDIR Grant “Calibration of photometric redshifts for the Euclid Mission” (Co-PI: EUR 438 403; 2023-2027)
 - DFG Collaborative Research Centre 1491: “Cosmic Interacting Matters” (PI Project F6: EUR 427 400; 2021-2027)
 - Graduate Research School Local Travel Award (AUD \$750; 2015)

- Graduate Research School Overseas Travel Award (AUD \$1 850; 2015)
- University of Western Australia Establishment Award (AUD \$2 000; 2013)
- University of Western Australia Safety-Net Top-Up Scholarship (AUD \$12 250; 2013-2016)
- Australian Postgraduate Award (AUD \$86 286; 2013-2016)

Successfull Telescope Proposals

2013 to Present

ESO VLT (optical)

- “Breaking redshift degeneracies in the Euclid colour-magnitude space” (PI), 100hrs, P117 (2026)

ESO VST (optical)

- “Deep photometry of spectroscopic fields: absolute calibration of the KiDS lensing power spectrum” (CoI), 48hrs, P108 (2021)
- “Deep photometry of spectroscopic fields: absolute calibration of the KiDS lensing power spectrum” (CoI), 60hrs, P106 (2020)

ESO VISTA (near-IR)

- “VISTA-VIPERS: is cosmic shear in tension with Planck?” (CoI), 15.3hrs, P102 (2018)
- “VISTA-VIPERS: is cosmic shear in tension with Planck?” (CoI), 15hrs, P100 (2017)
- “Is cosmic shear in tension with Planck?” (CoI), 5hrs, P98 (2016)

ESO 4MOST (optical)

- “4C3R2: 4MOST Complete Calibration of the Color-Redshift Relation” (CoI), 2026
- “Wide-Area VISTA Extragalactic Survey (WAVES)” (CoI), 2026

Jansky VLA (radio)

- “Wide-field HI observations of the GAMA/SAMI/DINGO fields” (CoI), 150hrs, 2014
- “Wide-field HI observations of the GAMA/SAMI/DINGO fields” (CoI), 264hrs, 2016

Parkes (radio)

- “Galaxy Evolution: a Pathfinder study” (CoI), 200hrs, 2013

Invited Visitor

2026 to Present

- Short-Term Visitor, Institut de Física d’Altes Energies (IFAE), UAB, Barcelona, Dec 2026
- Kavli Short-Term Visitor, Kavli Institute for Cosmology, Cambridge, Oct 2026

Collaborations: Project Leader

2015 to Present

- Euclid Collaboration Nz Calibration Task Force (Lead; 2025 to present)
- KiDS-Legacy Cosmology Working Group (Lead; 2023 to 2025)
- CRC1491: Project F6 “Dust and Dark Matter in Galaxies” (PI; 2022 to 2026)
- KiDS Redshift Calibration Working Group (co-Lead; 2019 to 2025)
- KiDS Data Release 5 Project (Lead; 2018 to 2024)
- KiDS+VIKING Photometry Working Group (Lead; 2016 to 2023)
- GAMA-KiDS+VIKING Photometry Working Group (Lead; 2015 to 2018)

Collaborations: Project Member

2013 to Present

- Euclid Collaboration Nz Calibration Task Force (zTF, Lead: 2025 to present)
- Euclid Collaboration Shear Calibration Task Force (SHECAL: 2023 to present)
- Euclid Collaboration Organisational Unit Shear Measurement (OU-SHE: 2023 to present)
- DFG CRC 1491: Cosmic Interacting Matters (2022 to present)
- Euclid Collaboration Visual Mask (Photometric) Tiger Team (VMPZ-ID-TT: 2021 to 2024)
- Euclid Collaboration Nz Calibration Task Force (zTF: 2021 to 2025)
- Euclid Collaboration Weak Lensing Science Working Group (WL-SWG: 2021 to present)
- PAU Survey Science Collaboration (2020 to present)
- Euclid Collaboration Organisational Unit Photometric Redshifts (OU-PHZ: 2019 to present)
- Dark Energy Science Collaboration Weak Lensing Work Package (Provisional Member; 2019 to 2023)

- Dark Energy Science Collaboration PZ Work Package (Provisional Member; 2019 to 2023)
- LSST Dark Energy Science Collaboration (DESC; Provisional Member; 2019 to 2023)
- Rubin Observatory Legacy Survey of Space and Time (LSST; Provisional Member; 2019 to 2023)
- Euclid Collaboration (2016 to present)
- KiDS Consortium Member (2015 to present)
- GAMA–WISE Matching Group (2014 to 2015)
- GAMA–H-ATLAS Matching Group (2014 to 2015)
- ALFALFA–GAMA Collaboration (2013 to 2015)
- GAMA Team Member (2013 to present)

Scientific Organising Committee

2015 to Present

- ‘KiDS Collaboration Meeting’, Bochum, Germany (Sept 2023; Chair)
- ‘Consensus Cosmic Shear in the 2020s’, Busan, South Korea (IAU General Assembly Focus Meeting, 2022; co-Chair)
- ‘KiDS Collaboration Meeting’, Warsaw, Poland (May 2022; co-Chair)
- ‘KiDS Collaboration Meeting’, Virtual (June 2021; Chair)
- ‘KiDS Collaboration Meeting’, Virtual (Nov 2020; Chair)
- ‘KiDS Collaboration Meeting’, Virtual (May 2020; Chair)
- ‘KiDS Collaboration Meeting’, Bochum, Germany (Sept 2019; Co-Chair)
- ‘Harley Wood School for Astronomy’, Perth, Australia (2015; Chair)

Astronomical Society Committee

2015 to 2016

- Early Career Researcher Chapter Steering Committee, Astronomical Society of Australia, Australia (2015-2016; Postgraduate Representative)

Journal Referee

2016 to Present

- Open Journal of Astrophysics (*OJA*, 2025 to present)
- The Astrophysical Journal (*ApJ*, 2024 to present)
- Astronomy and Astrophysics (*A&A*, 2018 to present)
- Monthly Notices of the Royal Astronomical Society (MNRAS, 2016 to present)

Lecturer

2011 to Present

- Cosmology (AIRUB, Bochum, 2023 to present)
- Statistics for Physicists and Astronomers (AIRUB, Bochum, 2021 to present)
- Observational Astronomy (MINT Summer School, Dr. Hans Riegel-Stiftung, 2023)
- Astrostatistics (Graduate School on Plasma and Particle Physics, Bad Honnef, 2023)
- Observational Astronomy (MINT Summer School, Dr. Hans Riegel-Stiftung, 2022)
- Astrostatistics Ringvorlesung (TU-Dortmund, Dortmund, 2021)
- Cosmology: thermal history and galaxy evolution (AIRUB, Bochum, 2019 to 2022)
- Lehrerfortbildung (teacher development): multi-wavelength astronomy (AIfA, Bonn, 2018)
- Optical Observations on NIR astronomy (AIfA, Bonn, 2017 to 2019)
- HSC Physics, Matrix Education (Sydney, 2011 to 2012)

Tutor

2010 to 2016

- Bayesian statistics and astrostatistics problems class tutor (ICRAR, UWA, 2014 to 2015)
- First year lab coordinator as Demonstrator-in-Charge (UNSW, 2011 to 2012)
- Tutor in first year astronomy (UNSW, 2011 to 2012)
- Tutor in general education astronomy (UNSW, 2010 to 2012)
- First year lab demonstration (UNSW, 2010 to 2012)
- Coach and Adjudicator for NSW GPS and AHGSS Debating (Sydney, 2010 to 2012)
- Tutor for HSC Mathematics, Physics, Chemistry at St Joseph’s College (Sydney, 2010 to 2012)

Project Supervisor: PhD

2020 to Present

- Eray Genc, “Exploring dust transport in dark matter halos of galaxies with weak-lensing surveys”, Ruhr-Universität Bochum, Germany (2022-2025)
- Anna Wittje, “Measuring weak gravitational lensing using accurate photometric redshifts and realistic simulations”, Ruhr-Universität Bochum, Germany (2021-2024)

- Jan Luca van den Busch, “A Study in Redshift: Simulating and Calibrating Cosmic Shear Surveys”, Ruhr-Universität Bochum, Germany (2020-2021)

Project Supervisor: Masters

2019 to Present

- Patrick Kleu, “Hunting for solar system objects in KiDS/VIKING imaging using data science methods”, GCCL, Ruhr-Universität Bochum, Germany (2024-2025)
- Joseph Dennis, “Analysis of Systematic Effects of Galactic Extinction in the Kilo-Degree Survey”, GCCL, Ruhr-Universität Bochum, Germany (2024-2025)
- Leon Gawytta, “Exploring the Lyman-break Galaxy population at $z = 3$ with KiDS”, GCCL, Ruhr-Universität Bochum, Germany (2023-2025)
- William Roster, “Validating redshift calibration methods for *Euclid* using Flagship2 simulations”, GCCL, Ruhr-Universität Bochum, Germany (2021-2022)
- Nicola Hunfeld, “Mitigating systematic biases in stacked weak-lensing analyses of clusters using CLMM”, GCCL, Ruhr-Universität Bochum, Germany (2021-2022)
- Anna Wittje, “Improving KiDS-1000 Tomographic Cross-correlation redshift estimates with PAUS”, GCCL, Ruhr-Universität Bochum, Germany (2020-2021)
- Anna Enders, “Studying Galaxy Evolution with Weak Gravitational Lensing in the Kilo-Degree Survey”, GCCL, Ruhr-Universität Bochum, Germany (2019-2020)

Project Supervisor: Bachelors

2017 to Present

- Tristan Galus, “Estimation of the stellar mass function of galaxies for the Kilo-Degree Survey DR5.”, GCCL, Ruhr-Universität Bochum, Germany (ongoing)
- Nena Schröer, “KiDS-Legacy Cosmic Shear with the SP(k) formalism”, GCCL, Ruhr-Universität Bochum, Germany (2026)
- Niklas Kroschinski, “Improving KiDS-Legacy Photometric Redshift Estimation for Tomographic Weak Lensing”, GCCL, Ruhr-Universität Bochum, Germany (2021)
- Elena Marci-Boehncke, “Optimising Tomographic Bin Definitions for Cosmic Shear Cosmology with KiDS-Legacy”, GCCL, Ruhr-Universität Bochum, Germany (2021)
- Florian Klienebreil, “Detection of the Cluster Red Sequence using KiDS and VIKING Photometry”, Argelander Institut für Astronomie, Universität Bonn, Germany (2017)

Meeting or Conference Organiser

2017 to Present

- ‘Consensus Cosmic Shear in the 2020s’, IAU General Assembly Focus Meeting, Busan, Korea (2022)
- KiDS Fall Consortium Meeting, Leiden, Netherlands (2021)
- KiDS Spring Consortium Meeting, Virtual (2021)
- KiDS Fall Consortium Meeting, Virtual (2020)
- KiDS Spring Consortium Meeting, Virtual (2020)
- KiDS Consortium Meeting, Bochum, Germany (2019)
- Euclid Consortium Meeting, Bonn, Germany (2017)

Public Outreach

2010 to Present

- Keynote Speaker, Astronomy on Tap Bonn, Bonn, Germany (Jan 2020)
- Keynote Speaker and Organiser, Astronomy on Tap Bonn, Bonn, Germany (April 2019)
- UWA Outreach Presenter and Organiser, AstroFest, Tom Price, WA, Australia (Aug 2015)
- Keynote Speaker at Residence of US Consul General, Perth, WA, Australia (Aug 2014)
- ICRAR Outreach Presenter, Various Locations, WA, Australia (2013 to 2016)
- UNSW National Science Week Presenter, Various Locations, Australia (2011 to 2012)
- Public Lecturer in Special and General Relativity, UNSW, Australia (2011 to 2012)
- UNSW Planatarium Demonstrator, Various Locations, NSW, Australia (2010 to 2012)

Grader

2011 to 2015

- Assessment marking for bayesian statistics problem classes (UWA, 2014 to 2015)
- Exam marking for first year astronomy (UNSW, 2011 to 2012)
- Assessment and Exam marking for general education astronomy (UNSW, 2011 to 2012)

AWARDS

Faculty of Physics, Ruhr University Bochum

- **Lecturer of the Semester** (Elective module category, Summer Semester 2021)

ICRAR, University of Western Australia

- **Best Student Talk** (ICRARcon, 2013)

Matrix Education

- **Physics Teacher of the Year** (2012)

University of NSW

- **B.L. Turtle Memorial Prize for Astrophysics** (2010)

ADDITIONAL
TRAINING

- Mental Health First Aid Certification (MHFAA; Standard)
- ALLY: Recipient of ALLY (Australia & New Zealand) training in diversity, equity, and inclusion, specifically regarding working with the LGBTI community
- HLTAID001: Provide Cardiopulmonary Resuscitation
- HLTAID002: Provide Basic Emergency Life Support
- HLTAID003: Provide First Aid

OBSERVING

AAT (GAMA) / 2dF (optical) **2013 to 2015**
• 5 Nights at AAT (1 run, 2014)

Parkes / (21cm)

2013 to 2015

- 5 nights performing deep observations of the HI content of the Sculptor Group of galaxies (P837; 1 run, July 2013)
- 13 nights performing observations of the HI content of the GAMA G23, G15, and G12 Fields (P669; 3 runs, 2013 to 2014)

TECHNICAL
SKILLS:
COMPUTING

Comprehensive understanding of, and proficiency in, the use of a variety of programming languages; in particular **R**, and additionally: Python, bash, Perl, C, Fortran, SQL, ADQL, PHP, and HTML.

Extensive experience with using astronomical software, including but not limited to (alphabetical): Aladdin, BPZ, CIGALE, GAIA, GALFIT, LePhare, MagPhys, Scamp, Source Extractor, SWarp, STILTS, and TOPCAT.

Intimate knowledge of Linux, Macintosh, and Microsoft operating systems, and a large variety of cross platform propriety (Office, IDL) and open source (bash, Gnuplot, git, L^AT_EX, R, Python) languages and software. Extensive experience in the writing, distribution, and management of astronomical software.

MAJOR

CON-
TRIBUTED
SOFTWARE

Pipeline Packages (primary author) **2016 to Present**

- **CosmoPipe (v2)**: Flexible cosmology analysis pipeline construction environment
- **PhotoPipe**: KiDS Photometric analysis pipeline
- **CosmoWrapper**: Wrapper to the CosmoPipe pipeline, performing data product generation such as redshift distributions and gold sample selection
- **CosmoPipe (v1)**: KiDS Cosmology analysis pipeline, from data catalogues to cosmology constraints
- **KiDS-VIKING-pipeline**: Reduction and Calibration of VIKING images for KiDS weak-lensing science

R non-CRAN Packages (primary author)

2013 to Present

- **Kohonen**: Self- and Super-Organising Maps for R
- **LAMBDA**: Lambda Adaptive Multi-Band Deblending Algorithm for R - advanced photometric deblending routines for PSF mismatched data
- **SOM DIR**: Direct Photometric Redshift Calibration using Self-Organising Maps
- **helpRfuncs**: Helper functions for R pipelines

R CRAN Packages (co-author, alphabetical order)

2014 to Present

- **astro**: R functions for Astronomical computing
- **magicaxis**: Scientific plotting for R

PRESENTATIONS

Information correct as of Jul 2026

Invited Talks

- 43 ‘Machine Learning methods for Cosmology’, ML4ASTRO, Malta (Sept 2026)
- 42 ‘KiDS-Legacy Cosmology and Extended Models’, Dark Energy Action Symposium, Montpellier, France (Nov 2025)
- 41 ‘KiDS-Legacy Cosmic Shear’, CMB-France National Conference, Paris, France (Oct 2025)
- 40 ‘Lesson for DESC Early Science from KiDS-Legacy’, Rubin DESC Collaboration Meeting, USA (July 2025)
- 39 ‘Weak Lensing Cosmic Shear’, CosmoVerse, Istanbul, Turkey (June 2025)
- 38 ‘Cosmic Shear Cosmology with the Completed Kilo-Degree Survey’, CIPANP, Wisconsin, USA (June 2025)
- 37 ‘Cosmological Analyses with KiDS Weak Lensing’, NASA Cosmic Structure Science Interest Group Seminar (June 2025)
- 36 ‘Redshift distribution calibration for KiDS-Legacy’, Rubin LSST DESC PZ Working Group Seminar (May 2025)
- 35 ‘Cosmic Shear Cosmology with KiDS-Legacy’, Heidelberg Cosmology Seminar, Germany (May 2025)
- 34 ‘Redshift distribution calibration for KiDS-Legacy’, Euclid WL-SWG Deep Dive Seminar (May 2025)
- 33 ‘Weak Lensing Cosmic Shear’, New Avenues in Particle Cosmology, Winchester, UK (May 2025)
- 32 ‘Cosmological Results from KiDS-Legacy’, EuCAPT (April 2025)
- 31 ‘Cosmological Results from KiDS-Legacy’, ESLAB Euclid Symposium (March 2025)
- 30 ‘Cosmological Results from KiDS-Legacy’, Cosmology Talks (March 2025)
- 29 ‘Euclid: Science and current status’, WAVES Collaboration Meeting, University of Western Australia (December 2024)
- 28 ‘Statistical Challenges in Weak Lensing Cosmology’, Seminar, Macquarie University, Australia (August 2024)
- 27 ‘Cosmic Shear with KiDS-Legacy’, ‘Golden Years’ Workshop, Leiden, Netherlands (Oct 2023)
- 26 ‘KiDS: Achievements and DR5’, A decade of ESO public surveys workshop, ESO, Garching (Oct 2023)
- 25 ‘Science with KiDS-DR5’, Royal Observatory, Edinburgh, Scotland (Oct 2023)
- 24 ‘Cosmic Shear with KiDS-Legacy’, Cosmology Seminar, ETH Zurich, Switzerland (Feb 2023)
- 23 ‘Machine Learning for Cosmic Shear Tomography’, Seminar, Swinburn Center for Astrophysics and Supercomputing, Australia (Nov 2022)
- 22 ‘Probing feedback with the shear-, magnitude-, and colour-position correlation functions’, CRC1491 GA, Bochum (June 2022)
- 21 ‘Cosmic Shear Cosmology with KiDS-Legacy’, Intruiging Inconsistencies Conference, Sesto, Italy (May 2022)
- 20 ‘Tomographic cosmic shear and the challenges of Stage-IV calibration’, Sydney University Institute for Astronomy, Australia, (Apr 2022)
- 19 ‘Cosmic Shear Cosmology with KiDS-Legacy’, Seminar, Laboratoire d’Astrophysique de Marseille, France (Apr 2022)
- 18 ‘Improved Cosmology with SOM Redshift Calibration’, Astrophysics Seminar Series, University of Leiden, Leiden, Netherlands [Virtual] (Jan 2021)
- 17 ‘Cosmic Shear in 2020’, DIRAC, University of Seattle, USA [Virtual] (Dec 2020)
- 16 ‘Translating Pixels into Cosmology for KiDS-1000’, Institut d’Astrophysique de Paris, Paris, France [Virtual] (Nov 2020)
- 15 ‘Organised Randoms’, Dark Energy Science Collaboration Large-Scale Structure Seminar [Virtual] (Sept 2020)
- 14 ‘KiDS-1000 Simulations: Description and Lessons Learnt’, Dark Energy Science Collaboration Cosmological Simulations Seminar [Virtual] (Sept 2020)
- 13 ‘KiDS-1000 Redshift Distribution Calibration’, Princeton Astronomy Seminar, Princeton, NJ, USA [Virtual] (Aug 2020)

- 12 ‘Photometric Redshift Calibration with Self Organising Maps’, Dark Energy Science Collaboration Redshift Calibration Seminar [Virtual] (Mar 2020)
- 11 ‘Photometric Redshift Calibration with Self Organising Maps’, DIRAC, University of Seattle, Washington, USA (Mar 2020; cancelled)
- 10 ‘Photometric Redshift Calibration with Self Organising Maps’, GCCL Seminar [Virtual] (Mar 2020)
- 9 ‘Cosmological Weak Lensing in 2019’, University of Hamburg, Germany (Dec 2019)
- 8 ‘Photometric Redshift Calibration with Self-Organising Maps’, LAM, Marseille, France (Sept 2019)
- 7 ‘KiDS+VIKING-450: A novel dataset for cosmology and astrophysics’, Ruhr-Universität Bochum, Bochum, Germany (May 2019)
- 6 ‘KiDS+VIKING Cosmic Shear Cosmology’, University of Oxford, Oxford, UK (Nov 2018)
- 5 ‘KiDS+VIKING Cosmic Shear Cosmology’, UCL, London, UK (Nov 2018)
- 4 ‘Exploring the Universe: Observational Methods and Facilities’, Universität Bonn, Bonn, Germany (Oct 2018)
- 3 ‘KiDS+VIKING: Technical Challenges of Combining Two ESO Public Surveys’, ESO, Garching, Germany (Oct 2018)
- 2 ‘Observational Methods and Facilities’, Universität Bonn, Bonn, Germany (Apr 2018)
- 1 ‘Galaxy Stellar Mass Functions’, University of Cardiff, Cardiff, Wales (May 2017)

Contributed Talks

- Stage-IV Cosmic Shear and the Curse of Covariate Shift, Cosmology from Home, (June 2022)
- KiDS-DR5 and Legacy Cosmic Shear, Warsaw, (May 2022)
- Local optimisation of galaxy redshift distributions, KiDS Consortium Meeting, [Virtual] (Sept 2021)
- KiDS Data Release 5, KiDS Consortium Meeting, [Virtual] (Sept 2021)
- Faint Sample Correlation Functions, KiDS Consortium Meeting, [Virtual] (Nov 2020)
- KiDS Data Release 5, KiDS Consortium Meeting, [Virtual] (April 2020)
- Photometric Redshift Calibration with Self-Organising Maps, Cosmology from Home Conference [Virtual] (Sept 2020)
- Photometric Redshift Calibration with Self-Organising Maps, Euclid OU-PHZ Workshop, INAF Bologna, Bologna, Italy (Nov 2019)
- Updated KiDS Photometric Redshift Calibration, KiDS Consortium Meeting, Bochum, Germany (Sept 2019)
- KiDS Data Release 5, KiDS Consortium Meeting, Bochum, Germany (Sept 2019)
- SOM Direct Redshift Calibration, KiDS Consortium Meeting, Leiden, Netherlands (Apr 2019)
- CSSOS-Euclid Photo-z Simulations, ISSI-Bern Workshop on CSS-Euclid, Bern, Switzerland (Dec 2018)
- Improved Random Catalogue Construction for Photometric Clustering, KiDS Consortium Meeting, ESO, Garching, Germany (Oct 2018)
- KiDS Data Release 5, KiDS Consortium Meeting, Bochum, Germany (Oct 2018)
- Towards a Baryonic Mass Function using the GAMA $z < 0.06$ sample, KiDS-GAMA-VIKING Workshop, Royal Observatory of Edinburgh, UK (May 2016)
- FIR Survey Synergies with GAMA, The Cosmic FIR Landscape, University of Lisbon, Portugal (May 2016)
- Multiwavelength Photometry, SEDs, and the properties of galaxies, Seminar, University of St. Andrews, UK (Sept 2015)
- MagPhys Analysis of 220,000 galaxies in GAMA, Modeling Galaxies Across Cosmic Times, Kavli Institute for Cosmology, Cambridge, UK (Sept 2015)
- Multiwavelength Photometry, SEDs, and the properties of galaxies, GAMA Meeting, Heidelberg, Germany (Sept 2015)
- Multiwavelength SEDs in GAMA, Multiwavelength Dissection of Galaxies, Sydney, Australia (May 2015)
- Refinement of Multiwavelength Photometry across all wavelengths, GAMA Photometry Workshop, Perth, Australia (Feb 2015)

- Multiwavelength Photometry and the LAMBDAR code, GAMA Meeting, Cape Town, South Africa (Sept 2014)
- Multiwavelength Photometry and the LAMBDAR code, GAMA Meeting, Sydney, Australia (March 2014)
- ALFALFA HI data and combination with GAMA, Seminar, ICRAR/UWA, Perth, Australia (Dec 2013)
- GAMA and Multiwavelength Analysis of Galaxies, Seminar, Cornell University, Ithaca USA (Oct 2013)
- Image analysis and quality testing in GAMA, GAMA Busy-Week, Perth, Australia (June 2013)

PUBLICATIONS Information correct as of 23 July 2026

Online bibliographies:

- [ADS/Scix Library](#) (Used for citation statistics below)

Summary Statistics:

- Total publications = 179 [9 as lead author]
- Total citations = 11,689 [1061]
- h-index = 53 [9]
- m-index (h-index / years since PhD = 53/9.0) = 5.9 [1.0]
- i10-index (Publications with more than 10 citations) = 117 [9]
- i100-index (Publications with more than 100 citations) = 35 [5]

Thematic Distribution:

Thematic classifications estimated via an unsupervised ML keyword matching of titles and abstracts

Theme	N_p	N_c	$\langle N_a/N_p \rangle$	$\langle N_c/N_p \rangle$
Astroinformatics	59	2552	18	43.3
LSS & Cosmology	68	2682	16	39.4
Galaxy evolution	24	1452	18	60.5
Machine learning & AI	15	307	16	20.5
Other	51	2120	16	41.6

Notes:

Individual papers can have multiple classifications (except ‘other’, which is populated with papers not covered by the other themes).

N_p : Number of publications

N_c : Number of citations

N_a : Number of authors

$\langle \cdot \rangle$: median over sample

Highlight Journal Publications (ordered by relevance)

- Wright, A.H., Stölzner, B., Asgari, M., Bilicki, M., Giblin, B., Heymans, C., Hildebrandt, H., and 32 colleagues (2025), “KiDS-Legacy: Cosmological constraints from cosmic shear with the complete Kilo-Degree Survey”, *Astronomy and Astrophysics*, 703, A158 (C=240)

Summary: The final cosmic shear cosmology analysis of the complete Kilo-Degree Survey, recovers an S_8 constraint that is consistent with Planck CMB. The paper demonstrates that improved systematic effect mitigation (redshift calibration, and image reduction), rather than simple reduction in statistical noise, is crucial to the resolution of a fundamental problem in cosmology: the S_8 -tension.

- Wright, A.H., Hildebrandt, H., van den Busch, J.L., Bilicki, M., Heymans, C., Joachimi, B., Mahony, C., and 26 colleagues (2025), “KiDS-Legacy: Redshift distributions and their calibration”, *Astronomy and Astrophysics*, 703, A144 (C=33)

Summary: The redshift calibration methodology for the final KiDS-Legacy cosmic shear analysis, using an expanded spectroscopic calibration data set and updated simulations to deliver the most precise $N(z)$ bias estimates yet achieved by KiDS. The paper shows that improved self-organising-map methods allow more sources to be used in each tomographic bin, while spectroscopic cross-correlations provide an independent validation of the calibration.

- Wright, A.H., Kuijken, K., Hildebrandt, H., Radovich, M., Bilicki, M., Dvornik, A., Getman, F., and 47 colleagues (2024), “The fifth data release of the Kilo Degree Survey: Multi-epoch optical/NIR imaging covering wide and legacy-calibration fields”, *Astronomy and Astrophysics*, 686, A170 (C=68)

Summary: The final KiDS public data release presents 1347 square degrees of synchronized nine-band optical-to-near-infrared photometry. Includes a greatly expanded set of observations over legacy spectroscopic survey fields. This release provides optimized multi-band source detection, photometry, and shear calibration for weak gravitational lensing cosmology.

- Wright, A.H., Hildebrandt, H., van den Busch, J.L., and Heymans, C. (2020), “Photometric redshift calibration with self-organising maps”, *Astronomy and Astrophysics*, 637, A100 (C=158)

Summary: We develop an unsupervised machine learning method using self-organizing maps (SOMs) to calibrate the photometric redshift distributions for the Kilo-Degree Survey (KiDS). By mapping the high-dimensional color space of the survey to deep spectroscopic reference catalogs, the technique establishes a robust framework for direct calibration, effectively controlling systematic biases for high-precision cosmic shear cosmology.

- Wright, A.H., Robotham, A.S.G., Bourne, N., Driver, S.P., Dunne, L., Maddox, S.J., Alpaslan, M., and 24 colleagues (2016), “Galaxy And Mass Assembly: accurate panchromatic photometry from optical priors using LAMBDA”, *Monthly Notices of the Royal Astronomical Society*, 460, 765 (C=165)

Summary: We develop an algorithm for calculating consistent, matched-aperture photometry across images with varying pixel scales and PSFs. The algorithm utilizes high-resolution optical priors to manage background estimation and object deblending across wide wavelength ranges, as demonstrated using 21-band data from the GAMA survey.
